

Rafael Jaramillo Estrada

rajaramilloestrada@alumni.fullsail.edu | LinkedIn | Guayaquil, Ecuador (UTC-5) | English (Fluent) / Spanish (Native)

PROFESSIONAL SUMMARY

Technical Project Manager with 10+ years bridging engineering teams and business objectives across energy infrastructure, fintech, and software delivery. Managed 4 parallel infrastructure installations coordinating 25+ contractors and international stakeholders under crisis conditions. Hands-on full-stack developer (React 18, TypeScript, Node.js, PostgreSQL) who shipped a production PWA generating \$2,500+ in first-week revenue with integrated payment processing and a 26-item security audit. Combines deep technical fluency with proven PM execution to drive projects from initiation through delivery across distributed, cross-functional teams. Bilingual English/Spanish.

CORE COMPETENCIES

Technical Project Management

Agile/Scrum

Cross-functional Coordination

Risk Management

Stakeholder Management

Remote Team Leadership

Software Development Lifecycle

API Integration

Security Compliance

Process Optimization

Bilingual EN/ES

PROFESSIONAL EXPERIENCE

Karpowership

Jan 2024 - Aug 2025

Senior Project Manager | Guayaquil, Ecuador

- Led delivery of 4 concurrent Powership installations during Ecuador's national energy crisis, managing scope, timelines, and deliverables across parallel workstreams from planning through grid connection
- Coordinated 25+ local contractors and international stakeholders (Turkish HQ, Ecuadorian government agencies), ensuring cross-functional alignment and zero miscommunication through bilingual technical translation
- Identified and mitigated critical delivery risks; designed a Guayas River transport system that reduced crew commute time by 90%, unblocking a major project bottleneck
- Negotiated 8+ vendor partnerships, managing resource allocation, budgets, and procurement logistics across distributed teams

Eagle Eye Productions

Apr 2022 - Feb 2024

Founder & Operations Manager | Guayaquil, Ecuador

- Founded and scaled a service delivery operation to 50+ clients, owning end-to-end project execution from scoping through quality control with consistent 2-4 day turnaround SLAs
- Managed a distributed team of 15+ remote contractors across multiple concurrent projects, optimizing resource allocation and enforcing delivery timelines
- Built standardized processes, communication workflows, and quality gates that sustained high retention across a diverse client portfolio

FireApp

Oct 2020 - Feb 2022

Front-End Developer | Remote (Ecuador)

- Delivered 5 web applications using Webflow and Angular 9, collaborating with a 5-person backend team through sprint planning, code reviews, and iterative delivery cycles
- Built user-facing interfaces for POS and loyalty systems, navigating trade-offs between design specs, technical constraints, and release deadlines

Radioi99

Sep 2016 - Dec 2020

Marketing Project Manager | Remote (Ecuador)

- Scaled program portfolio from 1 to 8+ programs, growing audience reach by 25% through strategic content deployment and cross-functional coordination
- Managed web presence, SEO, and social media across multiple program formats with distributed contributors

Offshore Gas & Oil

Apr 2015 - Aug 2016

Project Coordinator | Guayaquil, Ecuador

- Coordinated procurement logistics for 5+ remote operational sites, improving productivity by 20% and operational efficiency by 25% through supply chain process optimization and budget tracking

TECHNICAL PROJECTS

PULSE: Beat & Burn Production

Full-stack PWA launched to 100+ users, generating \$2,500+ in first-week revenue across 125+ transactions. Integrated PayPhone payment API for credit-based payment system. Completed 26-item security audit covering authentication, data handling, and payment flows. Built admin dashboard for real-time operations management.

React 18, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, PayPhone API

Glipy -- GLP-1 Health App Production

Cross-platform mobile health app for the Hispanic GLP-1 medication market. Sub-10-second dose logging, multi-medication tracking, freemium subscription model. Solo-built using AI-augmented development workflow, managing full SDLC from architecture to deployment.

Flutter, Dart, Riverpod, Supabase, RevenueCat

EDUCATION

B.S. in Game Design -- [Full Sail University](#)

Winter Park, FL

A.A. in Business Administration -- [Valencia Community College](#)

Orlando, FL

SKILLS & TOOLS

Project Management: Agile, Scrum, Kanban, SDLC, Risk Assessment, Budget Planning, Stakeholder Alignment, People Management
