PROFESSIONAL SUMMARY

Implementation Project Manager with 10+ years driving end-to-end technical deployments across energy infrastructure, fintech, and client-facing service delivery. Led 4 concurrent infrastructure installations from contract through go-live, coordinating 25+ contractors and international stakeholders under crisis timelines. Built and shipped a production payment platform processing \$2,500+ in first-week revenue with integrated PayPhone payment API, 125+ transactions, and a 26-item security audit. Combines hands-on payment systems experience with proven client onboarding and cross-functional coordination skills. Bilingual English/Spanish.

CORE COMPETENCIES

Implementation Management	Payment Systems	Client Onboarding	Agile Delivery	Stakeholder Management	API Integration
Technical Coordination	Risk Management	Process Optimization	Remote Operations	Bilingual EN/ES	

PROFESSIONAL EXPERIENCE

- Karpowership

Jan 2024 - Aug 2025

Senior Project Manager | Guayaquil, Ecuador

 - Managed end-to-end implementation of 4 concurrent Powership installations -- from contract signing through go-live -- coordinating planning, procurement, logistics, and grid connection across parallel workstreams
 - Served as the primary interface between 25+ local contractors, Turkish HQ, and Ecuadorian government agencies, ensuring stakeholder alignment and on-time delivery under crisis timelines
 - Negotiated 8+ vendor partnerships and managed resource allocation, schedules, and budgets across distributed teams spanning multiple countries and time zones
 - Designed a Guayas River transport system that cut crew commute time by 90%, proactively resolving a critical implementation bottleneck
- Eagle Eye Productions

Apr 2022 - Feb 2024

Founder & Client Delivery Manager | Guayaquil, Ecuador

 - Founded and scaled a client delivery operation serving 50+ clients, managing the full implementation cycle from client onboarding through quality assurance with consistent 2-4 day turnaround SLAs
 - Built and coordinated a network of 15+ remote contractors across concurrent projects, optimizing resource allocation and delivery timelines to maintain client satisfaction
 - Established standardized delivery processes, communication workflows, and quality gates that scaled without sacrificing service quality
- FireApp

Oct 2020 - Feb 2022

Front-End Developer | Remote (Ecuador)

 - Delivered 5 web applications using Webflow and Angular 9, collaborating with a 5-person backend team through sprint planning and iterative delivery cycles
 - Built user-facing interfaces for POS and payment loyalty systems, gaining hands-on experience with financial transaction workflows
- Radioi99

Sep 2016 - Dec 2020

Marketing Project Manager | Remote (Ecuador)

 - Scaled program portfolio from 1 to 8+ programs, growing audience reach by 25% through strategic deployment and cross-functional coordination
 - Managed web presence, SEO, and social media operations across multiple formats with distributed contributors
- Offshore Gas & Oil

Apr 2015 - Aug 2016

Project Coordinator | Guayaquil, Ecuador

 - Coordinated procurement logistics and financial operations for 5+ remote sites, improving productivity by 20% and operational efficiency by 25% through process optimization and supply chain management

TECHNICAL PROJECTS

PULSE: Beat & Burn Production

Full-stack payment-enabled PWA launched to 100+ users, processing \$2,500+ in first-week revenue across 125+ transactions. Integrated PayPhone payment API for a credit-based payment system with end-to-end transaction flow. Completed 26-item security audit covering authentication, payment data handling, and API security. Built admin dashboard for financial operations and real-time monitoring.

React 18, TypeScript, Node.js, Express.js, PostgreSQL, REST APIs, PayPhone Payment API

Glipy -- GLP-1 Health App Production

Cross-platform mobile health app with freemium subscription model and RevenueCat payment integration. Sub-10-second dose logging, multi-medication tracking. Solo-built managing full product lifecycle from architecture through deployment.

Flutter, Dart, Riverpod, Supabase, RevenueCat
